

CONNECTED WITH CARE

Patient Portal is the Nation's First Total Satisfaction Company.

We're different.

Total Satisfaction - before, during and after every hospital stay.

Combining leading edge technologies and a personal 24/7 Call Center to leverage a hospital's existing infrastructure, we:

- Provide a suite of services centered on education, safety, entertainment, comfort , and enhanced communication and support.
- Make the hospital experience easier for patients and their families
- Help your medical personnel be more efficient, productive and positive
- Support and extend hospital services
- Deliver all important messages, information, education and support at home or in the hospital via television, telephone, e-mail or post office mail
- Provide free service to deliver prescription drugs directly to patients in home

Prepared, educated and informed patients are more comfortable, respond better and react more positively - especially when surrounded by knowledgeable and caring family and compassionate health care workers.

Our services will help you maximize revenue, reduce staff involvement, extend services, increase patient security, reduce fraud, meet requirements, improve personnel relationships and add additional high-impact, low-cost services aimed at meeting your hospital's objectives, and only when you require them.

We believe success in today's healthcare environment is about more than patient satisfaction.

It's about Total Satisfaction.

Total Satisfaction is what we guarantee.
